UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown
Comments:

Is the evaluated use attainable? ☐ Yes ☐ No

Comments: The UAA was conducted in July 2005 and no WBCR was observed. The stream did not meet the maximum or average depth criterion at the 1 site evaluated. The site was at the headwaters of the creek and above any tributaries. The stream at this point was extremely shallow. No interviews were conducted. Because the site evaluated was in the headwaters of the stream, the committee did not have sufficient information to determine whether or not WBCR could be attained.

Committee Recommendation: ☐ Retain Use ☐ Modify Use ☐ Remove Use ☒ Inconclusive
